> Col. Richardson.-This gentlemen has just returned to Washington, after a long and laborious canvass for Governor in Illinois. He reports that the Democracy will triumph in that noble State, the home of the lion-hearted Douglas and of himself, by an unprecedented majority. The abolitionists have exerted all their strength to crush these two faithful champions of the Constitution in Illinois, but they have signally failed. If they had succeeded in their diabolical efforts, we suppose that Southern Know Nothings would have thrown up their caps in exultation and joy, just as they did two years ago, when their Black Republican allies were sweeping the North in the Congressional elections. And when Southern Know Nothings thus rejoice over the triumph of abolitionists and the defeat of the true friends of the Union, we are expected to give them credit for patriotism. We do not believe a word of it, and shall never say any thing like it. Patriotic, indeed! to rejoice at the success of the enemies of our country! We can only return out thanks to one and all in the full trust and expectation of receiving equally cheering news in November. Neither must we forget our brethren of the press. Unless they were provided with these charters, they would be treated as slave-traders by the Russian cruisers, and even transported to Siberia up on land. It is commonly assumed that these Turkish ships supply the Circassians with ammunition, but this is a mistake. The Turkish slave-traders very seldom bring any

From the Baltimore Sun. Washington, Aug. 8, 1856. England Urging the Sale of Cuba to the United States-Designs of Louis Napoleon upon Spain and Cuba-England and the United States bound

Movements of the highest importance in reference to the interests of the United States are now on foot in Europe, growing, in part, out of the assumed deigns of Napoleon III, upon Spain.

I may state, upon information not questionable, that the British Government have again urged upon the government of Spain the expediency of the sale and cession of Cuba to the United States. I say again, too, pending the Ostend conference the British government favored this measure. But now, in view of the ambitious project of Napoleon III, for the assertion of pretensions to the crown of Spain, that government has become exceedingly anxious to strengthen Spain, by cutting off her expensive and useless appendage of Cuba, and by the same means to enable Spain to improve her provinces, and be the better enabled to secure her independence against

domestic insurrection and foreign invasion. If Napoleon succeed in his intrigues, he will extend his empire over both Spain and Cuba, and this attempt is necessarily to be resisted by England, at the hazard of a war with France-a war in which she will gladly have the United States as an ally. The transfer of Cuba to any foreign power the United States have been pledged to resist ever since the administration of Mr. Monroe.

The British government have represented to the late government of Espartero, and the present administration of O'Donnell, that Spain cannot long retain possession of Cuba against the United States, and that she had better cede the island at once to the United States for a proper consideration—a hundred or a poble Sumner for defending Freedom." Just before the adjournment of the Senate on Wednesday evening (says the National Intelligencer) a message was read from the President of the United States, in answer to a resolution of the Senate call-We presume this story is true, and the moral we ing for copies of any correspondence relating to the in California. From the papers accompanying this message we obtain the folling information:

A letter was addressed to the President, on the sentiments manfully .- Philadelphia Sun, (abolition | State, and giving a recital of the lawless acts at San Francisco. The Governor asked for three thousand stand of muskets or rifles, fifty thousand rounds of recently passed through Lyons, France, on his way two guns of large calibre, with their munitions and appliances, promising that they should be paid for or returned; and in addition to these arms and munitions, he deputed special commissioners to this city to make application for a part of the military and naval forces of the United States to suppress the insurrection.

Secretary Marcy replied to the Governor of California on the 19th July, that the President is prepared, whenever an exigency arises demanding and justifying his interposition, to render assistance to suppress insurrection against the government of a State, and to maintain the supremacy or the laws to the extent of the authority vested in him by the constitution and acts of Congress. In the present case, however, he has serious doubts as to proceeding in the manner indicated, there being insuperable obstacles to the action now demanded of the government. He therefore referred the matter to the Attorney General whose decision thereon he approves.

Mr. Cushing argues that there is no evidence in the Governor's statement or other authentic information that in what has occurred in San Francisco there was committed or threatened any act of resistance of obstruction to the constitution or laws or to the official authority of the U. States. The President is only to be moved to action by the legislature of the State in which the insurrection exists, or of the executive of such State when the legislature cannot be convened, and when imminent or extreme public disaster can be averted only by such interposition of the federal government. He says the whole constitutional power of the State has not been exerted; and it does not appear that the Governor took any steps to convene the legislature of the State, although that remedy might have been adopted and had its effectual application to the evils long before any such

mile and a half of the Cape Fear River, with good spring water on both tracts, and on each tract the House accommodation is very good. The most of the hammock land is diked up six feet high, 800 yards long, and a portion of it is in Corn and Peas, which are very good. A Canal, one half of a mile long, which drains a Swamp of 80 acres; and the soil from 4 to 12 feet deep, which is good for Corn, Rice, &c. At the mouth of this Canal, where formerly stood a Mill, since the stream has been turned into the Canal there is a fall of 15 feet; the stones and irons are there, and a Saw and Grist Mill is much needed here. At high water the stream is boatable from the mill seat out to the Sound. The balance of Swamp Land is equally as fertile, and well adapted to all Agricultural purposes. The growth of the Upland is Oak, Hickory, &c., which is very good for Ground-Peas and Pota-

The Pea crop looks very well, and a young Orchard of various fruits. I will sell the two tracts together, or seperate, if desired, or in parcels to suit purchasers, on accommodating terms. A bargain is to be had in the above Lands by applying early subscriber on the premises.

TURPENTINE.

Another parcel on market this morning, for an file cents has been offered.

Spirits Turpentine.—There has been considerable activity in the market since Thursday last, and quotation of last sales show an advance of fully 3½ cents. The arrivals have been strengthened by the return of a splendid ha vest, good weather, advices from America of small receipts, and signs of returning confidence at Manchester. There seems a growing opinion that prices of cotton will rule higher during the larger portion of the week's operations have been rethe season. Prices for the lower grades were about I-16d higher, while the better qualities were unchanged—sales of the week 69,000 bales, including 10,000 on speculation, and 9,500 for export. The market closed firm, with sales on Friday of 12,000 bales.

Breadstuffs.—The Brokers' Circular says that prices of

flour are considerably lower, with little speculative demand, and quotes Is. a 2s. decline in the better qualities, and 3s. in the interior grades. The same circular quotes 4d. decline in wheat, with little speculative demand; and corn 6d. lower, with a steady demand. Other circulars report 6d. a 9d. decline in wheat, and 3s.

ROSIN—In the Common article but very little has been done since Thursday last, and the transactions that have taken place show a decline of 5 cents on previous quotation; holders, however, are not disposed to take \$1 15, and are generally asking \$1 20 for large bbls, of 310 lbs, and are

The provision market was unchanged.

DENTAL PRACTICE

HAS FOR FIFTEEN years been exclusively attended to by the subscriber.

Our treatment is such, that the teeth are put in a state of life preservation, and free from pain. After much study, invention and practice, we have attained to the very difficult art of stopping with gold, the decayed cells in the crowns of teeth, so solid and beautiful that the initials of the name may be engraved on them If practice gives skill and art, then perhaps, we can ex-

tract a tooth as easy and carefully as the case admits.

Particular attention is given to removing Tartar from, and polishing the teeth, that they are much benefited and Those who may prefer upper front artificial pivot teeth, which are more beautiful, comfortable and healthy than ar-tificial teeth on plates, we will be happy to wait upon. Persons who may wish to retain their teeth, so that they can properly masticate and taste food, and be free from pain, will do well to give us an early call.

We have, and still shall elicit the commendations of our K. SPENCER. patrons. June 11, 1856.-[237-3w

WILMINGTON, N. C., MONDAY, AUG. 11, 1856.

The elections in this county yesterday, passed off without any serious disturbance, though with very considerable excitement. The nominees of the Democratic party received the good old fashioned majorities that New Hanover can give. The majority for Bragg will rub up close to a thousand votes However divided in regard to local offices, New Hanover is again right side up, in all matters where party lines are drawn, and it is believed, that party principles are involved. Those who talk in jest or derision of the great Democratic party of New Hanover county, will find to-day that it is indeed a great party, and polls a great vote, leaving not a precinct in the county to poor Gilmer. Why, even Masonbore' has gon with the current, and cast a majority for Bragg. It is reported, we fear too truly, that our noble frier ds Langdon and Galloway have fallen in Brunswick, and fears are entertained that Jones has heaten Taylor for the Senate. This last, we trust is not so. We await the returns with much anxiety. Mr. Williamson is elected to the House of Commons from Columbus, and Bragg has 276 majority in the county, which is a gain. Returns from other counties come in very slowly to-day. By to-morrow, we expect to hear from a good many-sufficient to enable us to make some approximate calculation of Bragg's majority, for that he will have a majority is hardly questioned by any body. The Sheriff's election was close. Mr. Hall is re-

elected. Our Know Nothing friends made a considerable fuss in various ways, but they didn't do much at the pells. We are glad that matter is over.

There are still, at the time of our writing, 12 o'clock, noon, two precincts-Federal Point and Canetuck-to be heard from. They will not materially effect the result. Bragg's majority will not vary much from 950. To-morrow we will have and publish the full official vote of the county by precincts. We to not deem it necessary to publish an imperfect return to-day .- Daily Journal 8th inst.

The North Carolina Elections.

The returns come in slowly, but their complexion is too uniform to leave any doubt of the main result. The Democrats have carried the State by a large majority for Governor-larger than any Democratic candidate has ever obtained in the State. The Legislature will be Democratic by a considerable majority, Halifax, Wake, Orange and Rowan, have already given sufficient gains to counterbalance our loss in Bladen and Brunswick, although we must confess that it is a hard thing to become reconciled to the loss of Langdon, White and Taylor, all good, true and clever men. The Democrats there must pick their flints-serry their ranks-put away their divisions, and they will yet stand erect as in days of yore. Never give up the ship. Never allow disorganization to leave them again open to attack-never cry over spilled milk, but prepare to do better. jority. Sampson, Cumberland and New Hanover, where for a time our strength was nullified, but where we are now stronger for Bragg than ever before, show what concentrated action can do. If we have lost 3 members-2 Commoners and a Senator, in our neighboring counties, we have gained 11 or 12 in Halifax, Wake, Johnson, Orange and Rowan, making a net gain of 8 or 9, on joint ballott. Guilford has given a gain for Gilmer, but not within five hundred of what the orators at the big ratification meeting pledg-

P. S. We learn that twenty thousand dollars will fully cover all losses. Insurance five thousand.

This sum to be added for property not valued for undervaluations, and for the rise in the value of property since

1850 \$1,500,000,000 In the construction of this table, when the enumerations and valuations are not given from official State returns, it is assumed that the population and property of the country have increased in the same ratio since the general census of 1850, in which they

increased during the decennial period from 1840 to 1850. The increase has, without doubt, been proportionably greater. In some States the latest official valuations have been given. These are of various dates, and are, it is believed, much too low. The valuation for Massachusetts is for the year 1850; for Maryland and Michigan, for 1853; for Connecticut, New York and

Missouri, for 1854; and for other States, for 1855. With respect to some of the States, the official valuation is so very low, that it has been deemed nesent fairly the true valuation of the property in those States. Thus, to Pennsylvania \$500,000,000 have Your committee have bestowed upon the subject been added; to Virginia, Tennessee and Missouri

Texas and California are exceptional cases, and their population and wealth have been estimated upof Texas is the authority for that State. The Governor of Geergia says, in a letter to the

The Auditor of the State of Indiana, says, in his annual report, (November 24, 1855:) "A new val-

nation of the real estate would probably make the total taxables \$380,000,000 " The Territories of Kansas, Nebraska and Washexcept as component parts of other States or Territories, and, with respect to them, the estimated num-

some of the new States. The State valuations of property are for assessment purposes, and are not only low, but the taxable property only has been valued; and in all the States there are many kinds of property-some of valuable -that are not taxed.

Supposing the whole population of the United States to be 27,000,000, then, taking the State of ries will be, in round numbers, about \$5,760,000,000. Taking the State of New York as a criterion, the

Taking the State of Kentucky, then it will be Taking the State of Illinois it will be about \$7,

Taking the State of Arkansas, it will be about \$6, Taking the State of Georgia, it will be about \$14,-

Taking the two extremes, the maximum and the mimimum, Georgia and Maine united, it will be about \$10,000,000,000. Taking Ohio and Kentucky, which will make, perhaps, a very fair mean, the amount will be \$10,268,

Taking these seven States as a criterion, the amount will be about \$9,233,000,000. This is too low, however, for the official valuation is too low in them all, unless it be Georgia. The \$1,500,000,000 added for under valuations for

property not valued, and for the increase in value since 1850, is not an excessive allowance. In the calculations, inconsiderable fractions of numbers and values have not been regarded.

Elephantine Wrestlers of Japan. The attention of all was suddenly rivetted upon body of monstrous fellows, who trampled down the beach like so many huge elephants. They were professional wrestlers, and formed part of the retinge of the princes who kept them for their private amuse. ment and for public entertainment. They were twenty-five in number, and were men enormously tall in stature, and immense in weight of flesh. * * They were all so immense in flesh that they appeared to have lost their distinctive features, and seemed to be only twenty five masses of fat. Their eyes were prominence of their noses was lost in the puffcess of their bloated cheeks, and their heads were almost set directly on their bodies, with merely folds of flesh where the nick and chin are usually found. Their resolved that the Committee consist of the following great size, however, was more owing to the development of muscle than to the deposition of fat; for, although they were evidently well fed, they were not less well exercised, and capable of great feats of strength. As a preliminary exhibition of the power of these men, the princess set them to removing the sacks of rice to a convenient place on the shore for one hundred and twenty five pounds, and there were only a couple of the wrestlers who did not carry each French, Esq., to the meeting was unanimously adopright shoulder, lift the first from the ground and adjusting it without help, but obtaining aid for raising the second. One man carried a sack suspended by his teeth, and another, taking one in his arms, turned repeated somersaults as he held it, and apparently with as much ease as if his tons of flesh had been only so much gossamer, and his load a feather.
